NIKITA NAUTIYAL

UI/UX Designer

Hello,

I design digital products by starting with how people actually move through them. I wrote the PRD and designed Figma UI for Banknote AI and Coinzy: onboarding, free scan, bottom navigation, camera flow, and expert, on mobile and web. At Genuinest I led UI/UX for an iOS social app, from research and wireframes to 50+ high-fidelity screens and a reusable Figma system.

Case studies include India’s 112 emergency app, a music streaming prototype, and an interaction-heavy carousel built as a reusable component.

I would welcome a conversation about product design roles.

Nikita Nautiyal
