Grade - 94%

Projects

Trackzio Live Apps

6 Months

- Designed critical features including user onboarding, free scan functionality, camera identification, bottom navigation, and expert modules to enhance product usability.
- Developed comprehensive design assets covering flow states, error states, pop-ups, and toast messages for key product functionalities.
- Optimized back-navigation flows, improving user experience and significantly boosting user retention rates.
- Conducted product feature research and analysis; created PRDs and executed data-driven onboarding experiments to increase user conversion.
- Enhanced responsive design for mobile and web, and created app icons and storefront screenshots to maximize visibility and downloads.

Genuinest App UI

6 Months

- Revamped the UI across 50+ screens including onboarding, feed, reels, profiles, messaging, and settings.
- Conducted user and competitor research to identify improvement opportunities and implemented feature improvements based on insights.
- Built a reusable Figma design system for consistent UI and collaborated with developers for implementation and validation.

Banknote — AI Currency Identification App

- Designed UI/UX for an AI-powered currency identification application: developed user flows, wireframes, and high-fidelity mobile interfaces.
- Created onboarding and camera-based banknote scanning experiences and structured identification results with a comprehensive currency catalog.

- Worked on subscription and free-scan journeys and delivered development-ready UI specifications using Figma.

Coinzy — AI Coin Identification App

- Worked on UI/UX design for an AI-powered coin identification app: designed camera-based coin scanning experiences and intuitive mobile flows.
- Designed coin identification results, onboarding, subscription journeys, and reusable UI components in Figma.
